Thomas Joel

Value Rules

- Communicate with your Teammates

- Be empathetic toward your teammates

- Be flexible with meeting times but still attend them

- Resolve conflicts respectfully

- Be understanding of group members

Logistical Rules

- Unless there's an emergency, contact Chase or Kalyan 6 hours in advance if there's any type of scheduling conflict.

- Upon any conflicts, must let Chase or Kalyan know first so that team leads can resolve the situation immediately.

Technical Rules

- All code that will merged must be from a branch

- All pull requests should have at least one reviewer relevant to the pull request
    - Ex. working frontend, have someone working from end review it

- All code being merged should be related to a Github issue

- Everyone should be available for technical questions or advice

- No code should be merged if it doesn't pass a Github actions build

- All Java functions should have Javadocs

- All Pull Requests should be well described about its purpose and details
-

Consequences For Breaking Rules

1. A conversation with the person who was wrong

2. Team Leads individually talk to the person who was wrong

3. Have TA Intervention with that person

4. A Formal complaint with the TA
